SUMMARY

Architectural designer and construction manager with six years of practice across residential, commercial, hospitality and interior projects, completing an M.S. in Project Management (Construction Management concentration) at Northeastern University in December 2026. Takes projects from zoning analysis and DOB permitting through scheduling, site safety compliance and delivery, with New York experience in ADU design, residential interiors and DOB-approved site safety training.

Authorized to work full-time in the U.S. for 12 months via F-1 OPT.

EXPERIENCE

Project Management Coordinator | Quantum Design & Safety LLC, New York, NY Jan 2026 – Jun 2026

- Designed three detached accessory dwelling units (643–776 sq ft) for submission to New York City's pre-approved ADU plan library, producing floor plans, elevations, sections, electrical and plumbing layouts, door, window and area schedules, zoning analysis and presentation boards for each model.
- Specified all three models to exceed NYCECC insulation minimums, with heat-pump heating and U-0.27 / SHGC-0.4 glazing compatible with Passive House and ENERGY STAR, plus ADA-ready ramps and 60-minute fire-rated assemblies.
- Conducted zoning feasibility studies, navigated DOB permitting, drafted Stormwater Pollution Prevention Plans (SWPPP) and built construction schedules in Primavera P6.
- Designed the interiors for a proposed single-family residence in Newburgh, NY and produced the complete 30-sheet interior design set (furniture, lighting, HVAC and curtain-rail layouts, tile setting-out and joinery elevations), plus renders and bill-of-quantities schedules used to secure client sign-off.
- Developed site-specific safety plans and egress blueprints for 3 active New York City construction projects, coordinated against NYC Department of Buildings requirements.
- Ran operations for the firm's affiliated site safety school, 1A Accredited Bilingual Safety Training, a NYC DOB-approved SST course provider: designed interactive SCORM-compliant training modules in Articulate Storyline 360 and issued SST Worker cards, Supervisor cards and Worker Wallets under Local Law 196.
- Grew the school's sales by 36% by adding in-person classes at the Kew Gardens premises, coordinating instructor availability to fill the calendar, and running online and offline promotional campaigns.

Architect | ZED Architecture & Construction, Dhaka, Bangladesh Sep 2023 – Dec 2024

- Led design and documentation of a 6.8-acre resort masterplan (hotel, three-storey restaurant and conference hall, 20 rentable cottages, amphitheatre and owner's villa) from concept through construction drawings; now in construction.
- Directed a team of architects and draftspersons across concurrent residential, interior and hospitality projects, running client meetings, design reviews and approval milestones, and supervised construction on site to resolve field conflicts and keep projects on schedule.
- Prepared bills of quantities and reviewed contractor submittals, value-engineering finishes and details to control waste and cost.

Architect | Cornerstone Design Studio, Dhaka, Bangladesh Jun 2022 – Jul 2023

- Produced full architectural and interior construction document sets for residential and commercial projects, including a completed duplex apartment fit-out in Uttara, Dhaka, coordinating structural and MEP consultants to resolve clashes before construction issue.
- Conducted site inspections against approved drawings and trained junior staff on CAD standards and detailing.

Architect | Dreero.aec Architecture, Engineering & Construction, Dhaka, Bangladesh Nov 2020 – May 2022

- Delivered interior projects from concept through handover, including construction documents, 3D visualizations and material specifications, and prepared planning and permitting submissions to RAJUK, Dhaka's development authority.

EDUCATION

M.S. Project Management, Construction Management concentration | Northeastern University, Boston, MA Expected Dec 2026

Coursework: baseline planning model for a regional transit project; community-focused capstone.

B.Arch, Bachelor of Architecture | North South University, Dhaka, Bangladesh 2019

CERTIFICATIONS & MEMBERSHIPS

Site Safety Training (SST) Supervisor Card | NYC Department of Buildings Issued Oct 2026 · valid to Oct 2031

Member, Institute of Architects Bangladesh | IAB No. AA-681

SKILLS

Design & visualization: AutoCAD, Revit, SketchUp, Rhinoceros, Enscape, Lumion, V-Ray, Adobe Illustrator, Photoshop, InDesign

Project & construction management: Primavera P6, Microsoft Project, scheduling, budgeting, bill of quantities, zoning feasibility, DOB permitting, SWPPP, site safety plans and egress documentation

Training, media & AI: Articulate Storyline 360 (SCORM), Filmora, Claude, Gemini, GPT models; quick to learn new software

Languages: English (fluent), Bengali (native), Hindi (conversational)
